Remarks:

I have visually inspected and verified the condition of the container noted above. I confirm that the container is structurally sound, weather tight, has no false compartments, and the locking mechanisms are in good order and show no visible signs of being tampered with. All blocking ISPM-15 compliant (stamped or exempt). Container inspected and confirmed free of pest contamination

Inspected by: _____

Signature: _____

Version 3. December 2020

Pest contamination – visible forms of animals, insects or other invertebrates (alive or dead, in any lifecycle stage, including egg casings or rafts), or any organic material of animal origin (including blood, bones, hair, flesh, secretions, excretions); viable or non-viable plants or plant products (including fruit, seeds, leaves, twigs, roots, bark); or other organic material, including fungi; or soil, or water; where such products are not the manifested cargo within instruments of international traffic (i.e. containers, unit load devices, etc.).

WPM - wood or wood products (excluding paper products) used in supporting, protecting, or carrying a commodity. WPM includes items such as pallets, crates, boxes, reels, and dunnage.

ISPM 15 includes internationally accepted measures that may be applied to WPM to reduce significantly the risk of introduction and spread of most pests that may be associated with WPM. ISPM 15 affects all wood packaging material requiring that they be debarked and then heat treated or fumigated with methyl bromide and stamped or branded with the IPPC mark of compliance. This mark of compliance is colloquially known as the "wheat stamp". Products exempt from the ISPM 15 are made from alternative materials, like paper, metal, plastic or wood panel products (i.e. oriented strand board, hardboard, and plywood).
